DETAILED ACTION

1. This communication is responsive to the response filed 02/23/2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 2. Claims 1 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Mochida et al. (U. S. Pat. 3,509,290).

Regarding claim 1, Mochida et al. disclose a panel-form loudspeaker (Figs. 1A-C) comprising: a resonant panel-form member (1) and a vibration exciting system (2-3) on the panel-form member and adapted to apply bending wave energy thereto to cause the panel-form member to produce an acoustic output, wherein the vibration exciting system is adapted to apply torsion to the panel-form member as claimed.

Regarding claim 33, Mochida et al. further disclose the panel-form loudspeaker, wherein the vibration exciter/exciting system is adapted to the resonant panel for applying torsion and shear thereto, and said vibration exciting system is coupled to the panel to span a plurality of nodal lines in the panel (Figs. 2-3 and 5-6) as claimed.

3. Claims 1 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsda et al. (U. S. Pat. - 4,191,863).

Application/Control Number: 09/384,419

Art Unit: 2643

Regarding claim 1, Matsda et al. disclose a panel-form loudspeaker (Fig. 4) comprising: a resonant panel-form member (12) and a vibration exciting system (30) on the panel-form member and adapted to apply bending wave energy thereto to cause the panel-form member to produce an acoustic output, wherein the vibration exciting system is adapted to apply torsion to the panel-form member as claimed.

Regarding claims 5-6, Matsda et al. further disclose the panel-form loudspeaker comprising a suspension means (16) on which the panel is mounted as claimed.

4. Claims 1 and 23-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Azima et al. (U. S. Pat. - 6,144,746).

Regarding claim 1, Azima et al. disclose a panel-form loudspeaker comprising: a resonant panel-form member (2) and a vibration exciting system (9) on the panel-form member and adapted to apply bending wave energy thereto to cause the panel-form member to produce an acoustic output, wherein the vibration exciting system is adapted to apply torsion to the panel-form member as claimed.

Regarding claims 23-27, Azima et al. further disclose the panel-form loudspeaker, that the vibration exciter/exciting system (9) comprises a piezoelectric device attached to a face of the panel (Fig. 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

-Application/Control Number: 09/384,419

Art Unit: 2643

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mochida et al.

(U. S. Pat. - 3,509,290) or Matsda et al. (U. S. Pat. - 4,191,863).

Regarding claim 22, Mochida or Matsda et al. do not clearly teach all the details of the vibration exciting system as claimed. Since providing a suitable vibration exciting system for a desirable vibrating panel of a loudspeaker is very well know in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide suitable vibration exciting system, such as a rotor with conductive input elements for the panel speaker, for providing a loudspeaker with a desirable output power for satisfying certain applications.

Allowable Subject Matter

6. Claims 3, 7-21, and 34-39 are allowed.

Response to Amendment

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Suhan Ni** whose telephone number is (703)-308-9322, and the number for fax machine is (703)-305-9508. The examiner can normally be reached on Monday through Thursday from 9:00 am to 7:30 pm. If it is necessary, the examiner's supervisor, **Curtis Kuntz**, can be reached at (703) 305-4708.
